1. Claims 1, 5-8, and 12 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's independent claim 1: The present in invention is directed to a motor vehicle Media Oriented Systems Transport data communication network, the independent claim identifies the patentably distinct feature, "a wireless transceiver connected to the ring bus, where the wireless transceiver receives outgoing data from the ring bus and transforms the outgoing data to a wireless data format and transmits the transformed data, and receives incoming data and transforms the incoming data and provides transformed incoming data indicative thereof to the ring bus, where the incoming data is formatted as Bluetooth data". Applicant's independent claim 1 comprises a particular combination of elements, which is neither taught nor suggested by prior art.

Applicant's independent claim 8: The present in invention is directed to a method of communicating over a wireless communication channel between a motor vehicle Media Oriented Systems Transport network having a wireless transceiver and a wireless device, the independent claim identifies the patentably distinct feature, "receiving outgoing data at the wireless transceiver in a first data format compatible with the Media Oriented Systems Transport network and transforming the outgoing data to a second data format compatible with the wireless communication channel and providing a transformed output signal indicative thereof; transmitting the transformed output signal

over the wireless communication channel; and receiving incoming data at the wireless transceiver in the second data format and transforming the incoming data to the first data format, and providing a transformed input signal indicative thereof, where the second data format is compatible with Bluetooth". Applicant's independent claim 8 comprises a particular combination of elements, which is neither taught nor-suggested by prior art.

Applicant's independent claim 12: The present in invention is directed to a motor vehicle Media Oriented Systems Transport data communication network that communicates over a wireless communication channel with a wireless device, the independent claim identifies the patentably distinct feature, "means for receiving outgoing data from the ring bus in a first data format compatible with the Media Oriented Systems Transport network, and for transforming the outgoing data to a second data format compatible with a wireless communication channel and for transmitting a transformed output data signal indicative thereof over the wireless communication channel, where the transformed output data signal is formatted as Bluetooth data". Applicant's independent claim 12 comprises a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
